

PMR Data Validations

09/21/2026 11:06 am EDT

PMR Data Validations identify records that must be corrected or reviewed during the Principal's Monthly Report (PMR) process.

Review validation results based on severity:

- **FATAL** - Correct issues that prevent the PMR Summary from generating.
- **WARNING** - Review conditions that may affect PMR reporting and correct inaccurate information.
- **INFO** - Review reported conditions for accuracy or awareness.

Note: WARNING and INFO results do not necessarily indicate incorrect data. Review the identified information before making changes.

FATAL Validations

Identify issues that must be corrected before the PMR Summary can successfully generate.

Identify data that may affect PMR reporting and requires review.

Identify conditions that should be reviewed for accuracy or awareness.

IS

NEXT: After resolving all FATAL validations and reviewing applicable WARNING and INFO results, return to the PMR process and continue to **Review P**
