RPC02 - Possible Missing XG

11/08/2026 9:15 am EST

Summary

RPC02 - Possible Missing XG lists students with a Graduated With Certificate (GWC) diploma type and an enrollment at the same school in the following school year, but no XG flag was found for the reporting year or following year.

The warning means the student's record needs review. It does not confirm that an XG record is missing. Check the diploma type, enrollment, and flag records before making a change.

When this condition is flagged, the final progression outcome is **Review** until the issue is resolved

What to Review

Confirm that the student and school information is correct. Then check the diploma type, following year grade, and XG flag records.

Report field	What it shows
ReportEndYear	The end year of the reporting school year. For example, 2026 represents 2025-26.
schoolCode, schoolName	The school associated with the record.
studentUID, lastName, firstName	Information used to identify the student.
stateGrade	The student's grade at the reporting school during the reporting year.
cyStateGrade	The student's grade in enrollment at the same school in the following school year.
diplomaDate	The date recorded for the student's diploma.

Report field	What it shows
diplomaType	The diploma type recorded for the student. GWC means Graduated With Certificate.
finalProgressOutcome	The final progression result. This warning sets the result to Review until the issue is resolved.
outcomeReviewReason	The reason or reasons the student appears in RPC02.

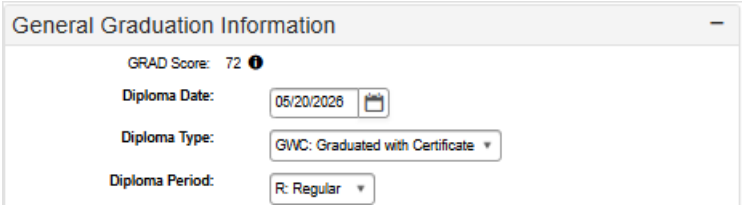

Review the XG flag record for both the reporting year and following year. The warning is based on the report not finding participation in either year.

Recommended Action

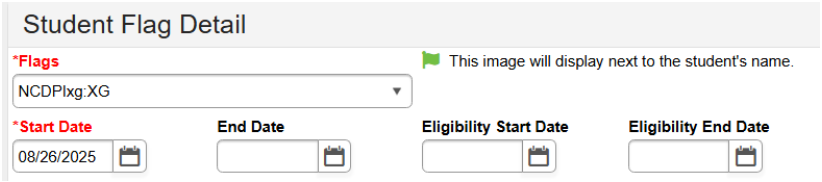

- Confirm that the student, reporting school, and grade information are correct.
- Check the student's graduation tool. Confirm that the diploma date and type are accurate.

- Check the following year enrollment at the reporting school. Confirm that the enrollment and grade are accurate.

- Review the student's XG flag for the reporting year and following year.

- If an XG record should be present, add or correct it through the Adding an XG Flag (https://nc-sandbox.knowledgeowl.com/home/adding-xg-flag) process.
- If XG participation does not apply, do not add an XG flag just to clear the warning.
- Correct source records only when they are inaccurate.

Verify the Review or Correction

After reviewing the records or correcting inaccurate information:

- Allow the RP data to refresh.
- Run the RP data validations again.
- Review RPC02 to confirm the results reflect the updated records.

If the source records are accurate and XG flag does not apply, the warning may remain because the report continues to identify the same record combination.
